

# FLIGHT INSTRUCTOR RATING COURSE

## Why a Flight Instructor Rating?

The Instructor Rating Course is a 12 week course (42 hours dual flight) designed to get students through their Flight Instructor Rating assessment with CASA, and prepare them for their career as an instructor. An instructor rating is one of the best ways to sharpen flying skills and enhance discipline, accuracy and proficiency. Additionally, completing an instructor rating increases the options that trainees have to get a job upon graduation. There are many instructing jobs offered around Australia each year.

Flight Instructors are at the forefront of providing entry level for pilots at all levels and this is a real responsibility. Flight Instructors have a real input into Aviation Safety Practices and Airmanship.

## How long?

The course structure has 42 hours dual flight with a team of instructors led by dedicated course manager and 120 hours ground briefings, including 10 hours supervised study. It will take between 12 to 15 weeks and requires a commitment of at least 3 days a week.

## Pre - requisites

- Australia Commercial Pilot Licence
- Class 1 or 2 Medical

## What you get

Instructor Rating with the following endorsements:

- Grade 3(A) training endorsement
